

## 'EMPTY PROMISES,' LA GUARDIA REPLIES

Says Transit Commission Can-  
not Extend Lines Without  
Board of Estimate.

### CITY ASKS POSTPONEMENT

Wants Hearing on Mandamus  
Proceedings to Go Over  
for a Week.

Upon receipt yesterday of the refusal of George McAneny, chairman of the Board of Estimate, to pledge the Board of Estimate that the commission would not undertake to increase subway fares before the courts pass upon the validity of the transit act, E. H. La Guardia, President of the Board of Aldermen, issued a statement charging that "all promises of new lines and new extensions made when the transit law was under discussion were empty promises not capable of being kept," since the "Transit Commission must depend upon the Board of Estimate for funds. The Aldermanic President expressed, as follows, his regret at the failure of Chairman McAneny to confide his plan to him: "I thought we were going to have full, frank, open public discussions and dealings with the city."

The failure of Mr. La Guardia to drive a compromise with the Transit Commission, whereby the Board of Estimate would recapitulate by appropriating funds for the commission, was followed by a request from John P. O'Brien, Corporation Counsel, to Justice Whitaker of the Supreme Court, for postponement of today's hearing upon the petition for a writ of mandamus to compel the city to pay the commission's employees.

It is expected that the hearing upon the commission's petitions for orders compelling the Board of Estimate to appropriate money, set for hearing in the Appellate Division today, will be postponed until next week.

Meanwhile, the Transit Commission has begun to function as agent for the city, as empowered by the transit act, by signing for the city an agreement with the Interboro Rapid Transit Company to provide for a western terminus of the proposed extension of the Queensborough subway at Eighth avenue and Forty-first street, Manhattan, instead of at Broadway and Forty-second street. There will be a station at Forty-first street and Seventh avenue connecting with the southern end of the existing Times square station of the Interborough.

The commission also fixed June 20 as the date for receiving bids for 25,000 ties and a supply of special work, including switches and cross-overs for the Fourteenth street-Eastern subway now under construction.

### JUDGE ROSALSKY CALLS ROBBER A MURDERER

Sentences Jacob Harodner to  
Ten Years in Sing Sing.

When Judge Rosalsky, in General Sessions yesterday, sentenced Jacob Harodner to ten years in Sing Sing for robbery, he accused him of murder. He told Harodner he believed him guilty of shooting and killing Joseph Cohen, a hat and fur manufacturer, whose death at Coney Island, in August, 1919, has remained a mystery.

"You are not only a notorious criminal, but a murderer," said Judge Rosalsky. "That is a broad statement for a judge to make, but I know what I am talking about. Assistant District Attorney Edelson has performed a public service in obtaining your conviction."

Harodner was indicted for the murder of Cohen, but the evidence was insufficient, and he was released on bail. Last December he and two others robbed Philip Ente of 92 Lewis street of \$900 in a card game. In a dispute with his partners over the division of the spoils Harodner was shot four times, and the shooting led to his arrest. Two of the bullets are lodged in his spine.

### SOUNDING WOMEN ON LEAGUE.

President Harding to Get Result  
of Straw Vote.

President Harding is going to learn how 15,000 women voted on the League of Nations question, the information, which it is to be sent him by the Women Citizens, representing the result of a straw vote being conducted by this publication. Mrs. Raymond Brown, managing director of the magazine, which is the official organ of the National League of Women Voters, announced yesterday that ballots have been sent to club women and other new voters throughout the country. While the Women Citizens is taking no stand on the issue, Mrs. Brown said she thought President Harding would be glad to know and to follow the people's desires.

### POLICEMAN ENDS LIFE.

Michael J. Doolan Had Been Suffering  
From Heart Trouble.

Patrolman Michael J. Doolan, 27 years old, was to return to duty yesterday at the expiration of a leave of eighteen days on account of heart trouble, but, according to the police, about the time he was to report he shot himself in the head and died.

He used the revolver of his brother-in-law, Patrolman Edward Luby, who also was attached to the West 152d street station. John M. Doolan, a brother of Michael, is attached to the Kingsbridge station, and has been on sick leave for several days. The shooting took place, according to the police, at 32 Marble Hill avenue.

### FOUR HELD UNDER DRUG ACT.

Charged With Unlawfully Selling  
Narcotics.

Michael Lungo, Carmine Prezioso, Angelo Juliano, Charles Juliano, Charles Lamanti and Anthony Capriccio were held in \$5,000 bail yesterday by Samuel M. Hitchcock, United States Commissioner, on a charge of selling narcotics in violation of the Harrison Drug Act. The men were arrested Wednesday night in the crusade being waged by Federal agents and the police in an endeavor to stamp out the growing drug habit in this city, which Government officials declare has resulted from smuggling rings operating through crews of steamships from European countries.

### ENRIGHT TAKES VACATION.

The door of Police Commissioner Enright's private office was locked yesterday and it was announced that the Commissioner had gone away on a vacation. His resting grounds were not made public, but his habit has been to visit Atlantic City on such occasions. The official who announced the Commissioner's going said there was "little or no pressing work" in the Police Department to require his attention at this time.

## GIRL BATHER INSISTS UPON BARE LEGS IN ATLANTIC CITY

She Is a Presbyterian Sunday School Teacher and Declares Confidently That Silk Stockings Are Much More Tantalizing Than the Real Article.

ATLANTIC CITY, June 2.—Miss Ada Taylor, a Presbyterian Sunday school teacher, a champion high diver and president of the Ambassador Swimming Club, doesn't think much of the new beach regulations of Atlantic City, which prohibit one piece bathing suits for either sex and prescribe stockings and skirts for women. She has written a letter of protest to Dr. Charles E. Boasert, chief beach censor, in which she declares that the sheer, tantalizing silk stockings are worse than bare legs.

"Atlantic City regulations," says Miss Taylor's letter, "require girls to wear more clothing when they go in swimming than when they attend fashionable balls. As one who enjoys swimming, I have no patience with stockings. They become water soaked and filled with sand, and not only are a nuisance but a real source of danger. They make swimming hazardous."

"As one who likes clean minds, I have no patience with stockings. It does not take much observation to realize that stockings, particularly those sheer, transparent silk ones—and who wears wool on the beach?—fail to improve morals."

"In all candor, doctor, who really attracts the really unfavorable attention, the girl bather with bare legs or milady who rolls along the boardwalk with her legs crossed, showing her costly silk stockings at least to the knee?"

"Only the stocking manufacturers and the bathhouse proprietors profit by the rule you seek to enforce."

### PATERNO WANTS HOUSE BACK.

The marital differences between Francis S. Paterno and Mrs. Helen Far Paterno became further involved yesterday through the filing of a suit by the former to compel his wife to deed to him the equity in the house at 635 West 113th street. Paterno says he bought the equity for \$3,000 over two mortgages, bringing the purchase price to \$50,000, and that he gave the property to his wife to hold for him with the understanding that he was to have title whenever he asked for it.

### TRANSIT MEN'S FIGHT DELAYED

Justice Whitaker in the Supreme Court yesterday granted, upon application of Corporation Counsel O'Brien, postponement to today of argument on a motion of Frank Bennett, an inspector employed by the Transit Commission, for a mandamus directing Comptroller Craig to approve payment to Bennett and other attaches of funds from the city treasury.

Special attention is given to the possibility of reducing unemployment by using public works as a "buffer." This policy, which is in general use in foreign countries, is considered with special reference to New York city. It is pointed out that the city, which has invested in the last eleven years an average of \$65,000,000 in more or less permanent improvements, might well plan its public works with reference to the state of employment as well as to the other factors that necessarily must be taken into account.

Reference is made to a recent recommendation of the Governor of Massachusetts, who proposed reserving 10 per cent. of the normal expenditures for improvements of city or State in anticipation of coming business depression. The bulletin points out that such a reserve in New York would provide a fund of \$65,000,000 after a decade of savings, thus making possible a reservoir of employment to offset inactivity in private industry.

The Coordinating Committee on Employment Activities in New York city has just issued bulletin No. 111, which calls attention to the fact that the employment situation in the city is more critical than is generally supposed, and that it is not improving from month to month.

Figures are cited from the United States Employment Service, the Federal Reserve Board and the State Industrial Commission which uphold this conclusion. The conclusions of the bulletin are, as a result of a study of employment fluctuations in more than 800 factories in this city, that the present extent of unemployment is much more serious than it was in 1914, and that a conservative estimate would place the number of the unemployed at more than 300,000.

Especially attention is given to the possibility of reducing unemployment by using public works as a "buffer." This policy, which is in general use in foreign countries, is considered with special reference to New York city. It is pointed out that the city, which has invested in the last eleven years an average of \$65,000,000 in more or less permanent improvements, might well plan its public works with reference to the state of employment as well as to the other factors that necessarily must be taken into account.

## FIVE CITY BUREAUS IN MEYER INQUIRY

Continued from First Page.

Reges. Mr. McManus as a district leader has been much in contact with men who had to do business with city departments and the committee wanted to know whether those men had given any information to him. It was thought that wide publication of the fact that process servers had been searching for him several days might reach McManus and he would communicate with the committee.

Justice Edward G. Whitaker in the Supreme Court reserved decision yesterday on the application made by counsel for the committee to punish John A. Leach, First Deputy Police Commissioner, for refusing to be sworn as a witness before the committee.

### BRIDGE JUMPER IS SOUGHT.

Members of the marine division of the Police Department are looking for the body of an unidentified negro who was seen to jump from the Manhattan side of the Manhattan Bridge yesterday afternoon. He struck the water near the Pike street slip.

Edward Barrett of 94 Market street was standing at Market and South streets when he saw the body fall from the south promenade of the bridge. He notified Patrolman James Allen of the bridge precinct. At the Oak street station it was said that a patrolman on duty in South street also had seen what he believed to be the body of a man falling through the air.

Mr. Koenig later went to Washington to see the President and the Postmaster General in regard to the appointment of a Postmaster here to succeed Thomas G. Patten. He was accompanied by George A. Glynn, chairman of the State Committee. The organization has endorsed Edward M. Morgan, former Postmaster. Recently there has been an independent drive to get the appointment for John J. Lyons. The appointment can be made only from a civil service list. Mr. Morgan is too old to enter an examination, but he could be restored to the civil service, in which he worked for many years, and then appointed Postmaster.

# Why New York Prefers Camels

New York demands a quality smoke—and finds it in Camels. For Camel is the quality cigarette. And it leaves no cigarettey aftertaste.

Back of Camel quality are many economies which we practice in making and marketing them.

For instance! The Camel package is the most perfect packing science can devise to keep cigarettes fresh and full flavored. But you find no flashy frills or needless expense that must come out of the quality of the tobacco or go on to the price. These costs are unnecessary because they do not improve the smoke.

Then too, Camels are sold only in one size package—20 cigarettes—just the right number to make the biggest saving in production costs. And remember this! When you buy 20 cigarettes in smaller size packages, you must pay for two

handlings in packing and for two separate packages—instead of one.

These are two reasons why you get Camel quality at so moderate a price.

Here's another. This company has never resorted to employing men—in the guise of disinterested citizens—to spend their time in hotels, tobacco stores and restaurants to boost Camels. Camel Quality does not require artificially inspired enthusiasm.

Such methods increase selling costs to a point where the smoker cannot possibly get his money's worth.

Camels are made for men who think for themselves. To such folks Camel Quality does its own talking. When you smoke Camels you don't need anyone to tell you what you like.

You KNOW.

# Camel
